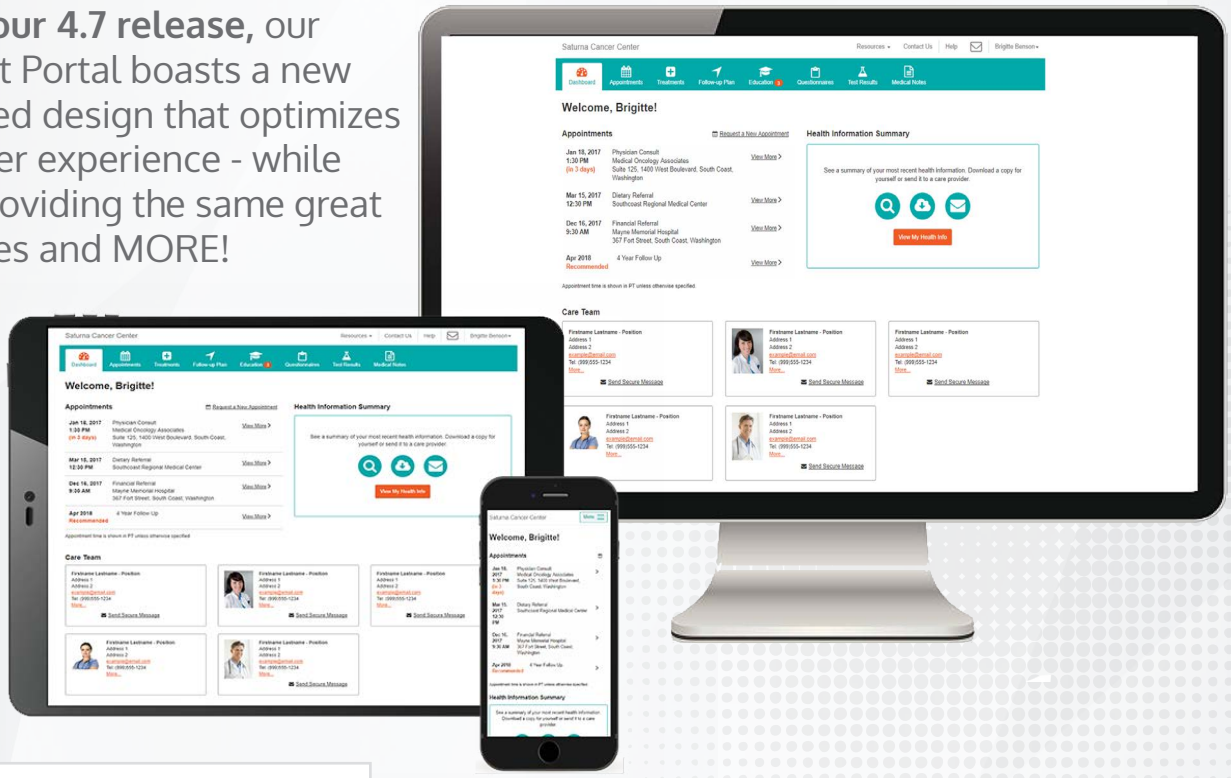
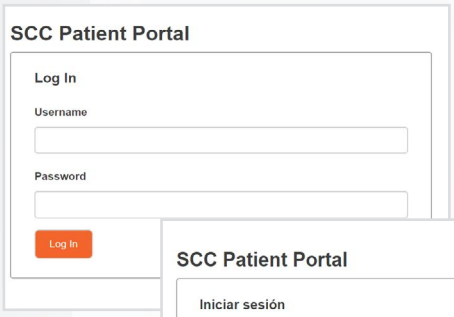
WELCOME TO THE NEW PATIENT PORTAL!

WHAT'S NEW IN THE PATIENT PORTAL?

With our 4.7 release, our Patient Portal boasts a new updated design that optimizes the user experience - while still providing the same great features and MORE!





Mobile Support - new responsive design that enables patients easier navigation to all the patient portal features (including dashbaord, appointments, health information and care teams.

Multi-language - 4.7 introduces internationalization - that allows for localized languages. We currently offer the English and Spanish.

More languages to come!

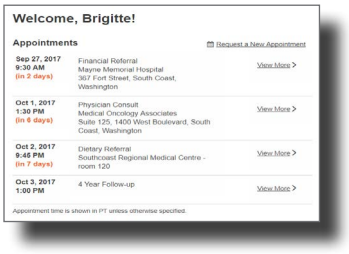
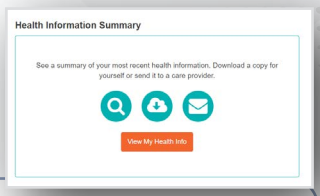
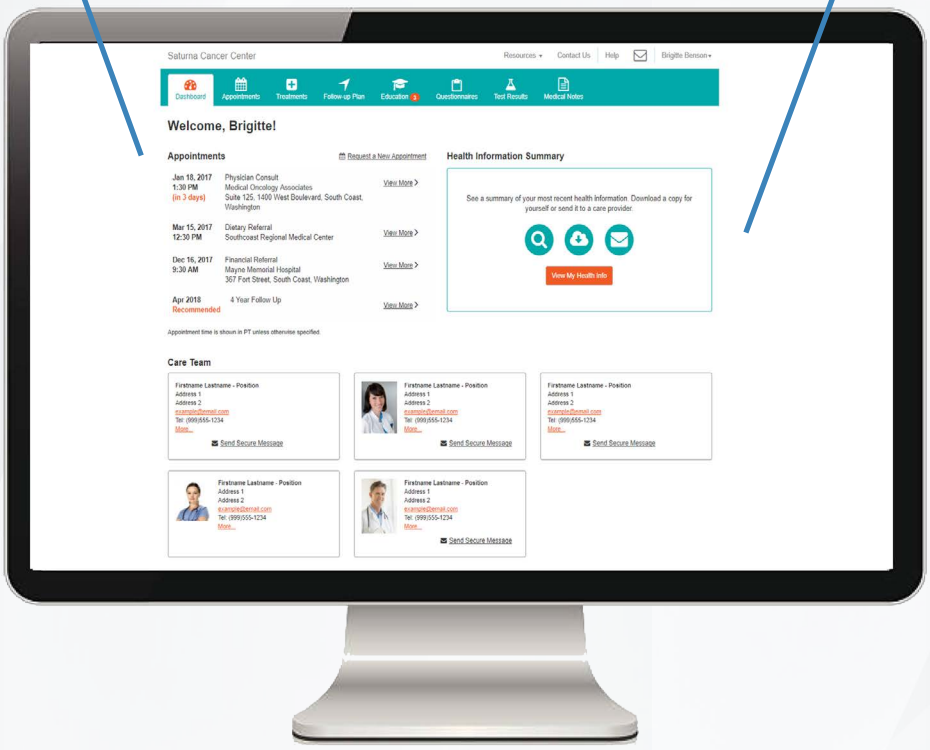
SAME FEATURES, NEW LOOK!

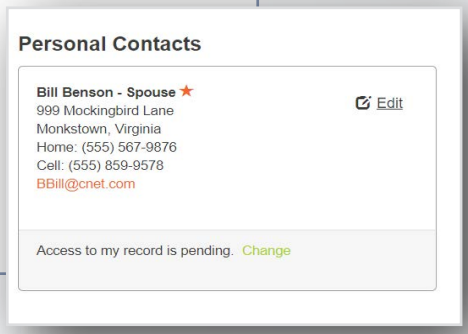


Appointments - View all apointments in one place, request new appointments and set up automated text or email appointment reminders



Health Information Summary (HIS) - Access your health informaton summary - which includes diagnosis, medications, allergies and lab results. To access your HIS, click "View Health Info," with the option to select a date range to download and/or send this summary to another healthcare provider. **Tip – Use this feature to send a list of your medications to your family doctor.**





Personal Contacts - Invite friends and family to participate in the patient portal and access your Care Teams medical records. Click "Add a Personal Contact," and select "Authorize to access patient's record." Your contact can now view your medical records as well as complete some actions on your behalf, such as sending a secure message to your care team. **NOTE - Access to medical records is not the same thing as medical power of attorney.**
